

How to make a bun

1. First wet the hair. Wet hair is easier to work with and goes up into a bun faster.

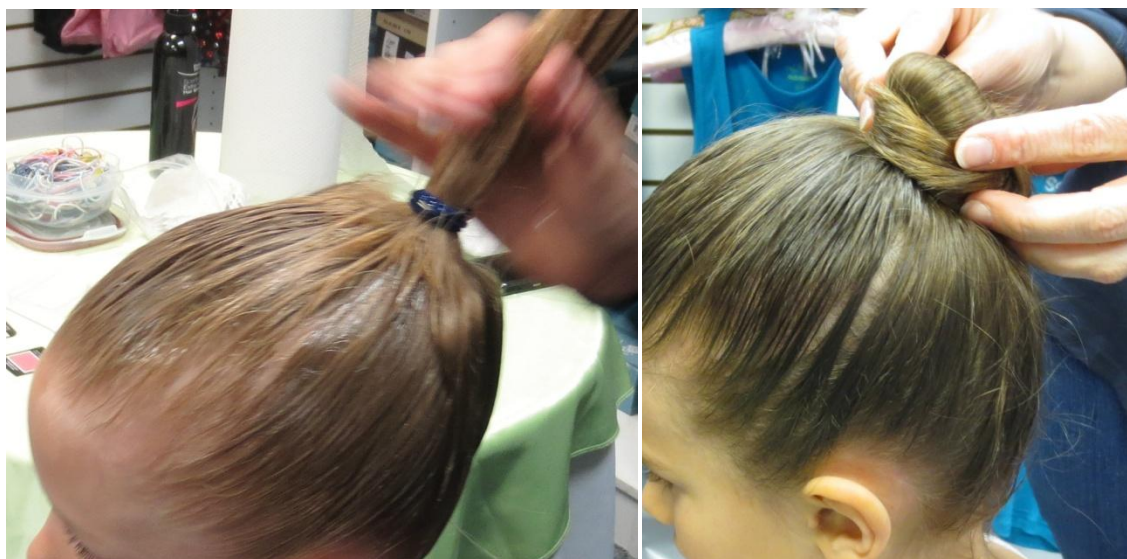

2. Then brush or comb all the hair into a high pony (on the crown of the head).

3. Use gel to smooth all the hair back, making sure to get all the stray hairs. You may need to use bobby pins to secure loose hair and bangs.

4. From here, you can make a bun one of two ways. 1) You can gather up the hair, twist it into a bun on top of the head and pin in place.

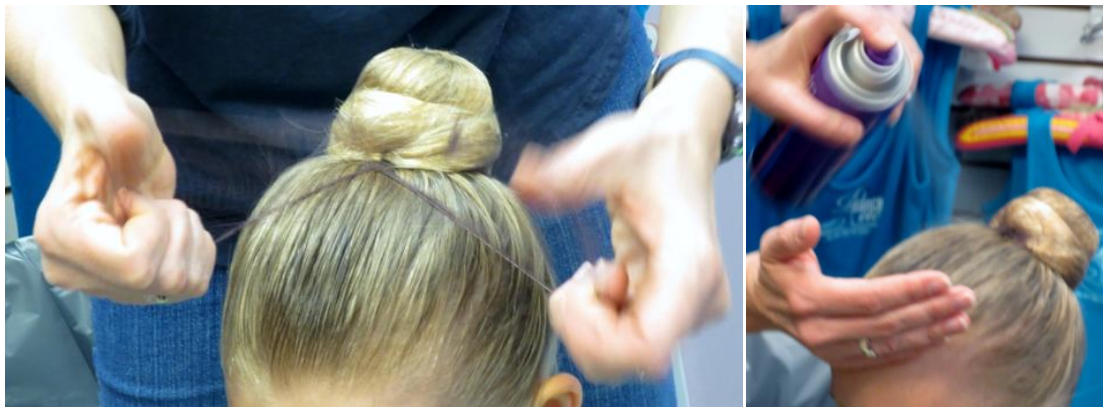

5. Or, 2) Use a sock, cut off the bottom, put around pony.

6. Then wrap the hair around, and pin in place to make a bun.

7. After you have secured the bun, wrap the hair net around the bun to trap any stray hairs and create a smooth look. Make sure to use hair spray to finish!!

The bun should sit on the crown of the head, peaking right over the top, just visible from the front!!
